PROJECT SUMMARY

57%

Energy reduction

Goal

Achievement

Improve lighting quality

Lighting levels have been increased and uniformity improved

Reduce energy consumption

57% savings over old lighting technology

CASE STUDY - Centrelink

Lumitex Solution

The client required an energy efficient lighting upgrade with an uplift in lighting levels to improve aesthetics and workspace comfort in the main office areas.

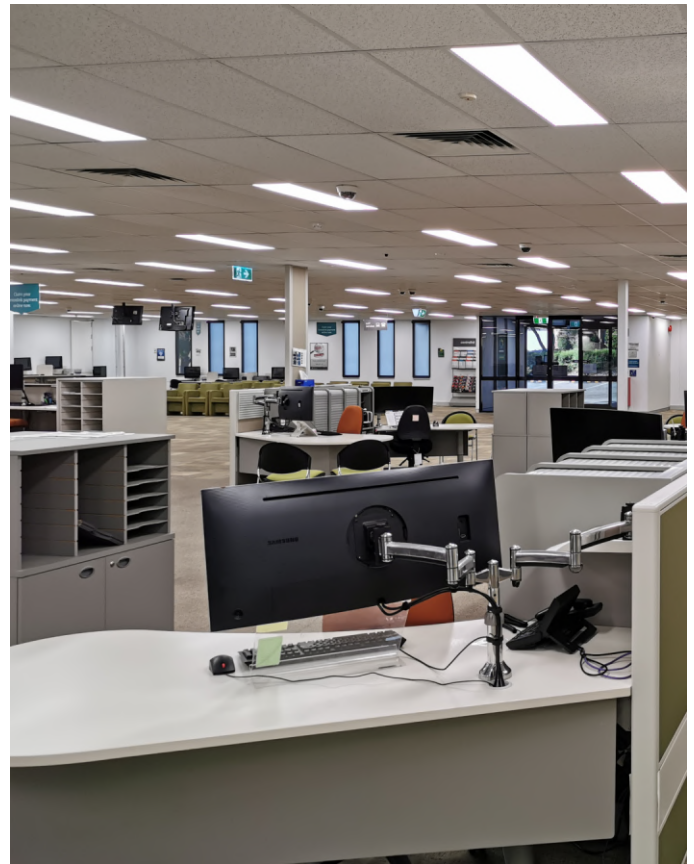

The entire building was upgraded, including outside wall lighting, storage areas, kitchen and amenities.

The upgrade could only be done after hours and minimal downtime was the key criteria.

Lumitex arranged an all-night upgrade which allowed normal daytime operation without any disruption.

Staff returned to work greeted by fabulous new lighting and a fresh new working environment.

Management are delighted with the outcome and have provided very positive feedback.

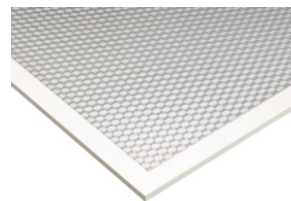

PRODUCTS USED

Consort Downlight

Lofty Panel

Honey Panel

Stormie

If you have an office building or other commercial area you would like upgraded with Lumitex LED lighting, contact us for an obligation-free discussion.
